

I find it outrageous that Sinclair Broadcasting should run a smear campaign on one of the presidential candidates on all of its 62 affiliates just days before the election.

That goes FAR beyond the appropriate or responsible use of PUBLIC air waves. When huge companies are allowed to own the airwaves and their traffic, and use it like this, that will incite the rage of many other citizens who work to make the public educated on the issues rather than manipulated by corporate interests.

Thanks, this issue will not loose my attention.
